Course Synopsis ✎

Welcome to Gross and Clinical Anatomy 1 Course (GAT506)

Edit ▾

This course provides knowledge in gross anatomy in the regions of thorax, abdomen, pelvis, upper limb, and lower limb. This course emphasizes the understanding of the context of anatomical terminology and detail information of major internal and external structures in the human body by a regional approach. It also relates to the important function and clinical application. The mode of delivery will be in the form of lectures and practicals. At the end of the course, students will be assessed by means of continuous assessment (seminar presentation) and end of semester examination.
