

Ayuni Hasanah

Hi ! i am Ayuni Hasanah. Nothing special bout me but i will share with you guys a little bit about my background and why i am here. H&H&E. First of all, i am third years student and i from school of Education. I grew up in Taiping, Perak because my parent also from Taiping. My father is Mohd Saberi bin Abdul Rashid and my mother is Kiah binti Abd Wahab. My father was a truck driver and my mother worked as a general assistant. I have six siblings and I am the second child. I only have One younger brother and I also have twin sisters who were born on independence day. I got my education at SMK Matang and continued my studies at SMK Simpang for STPM. I did not get any offer to go to university after finishing SPM and I chose to continue form six because my friends are pursuing their studies at the Diploma level. I never planned to go to university because from UPSR until SPM I never got good results. Actually, I want to quit form six in semester one, but my father told me to wait until the result of semester one comes out and the result comes out. My result of 3.0 and above I chose to continue form six. I finished form six with a 3.67 pointer. The decision to go to university was all I managed myself and I had chosen special education in the first choice. My mother and father took me for the Medsi test in Tanjung Malim and I passed. I went for an interview myself at that time. Thank God I got USM close to my family because this is the first time I'm away from my family. To raise money to go to university I work in the school canteen during the day and night I will make couches for married people. I used the elementary school scholarship money and the form six scholarship I got. It is very fun when we use our own money to study because we will study hard. Now that I am in my third year of study, thank you to my family, friends, lecturers and everyone who has given me support and encouragement so that I am still here.
