

# AYUNI'S REFLECTION AS USM STUDENT

During my three years at USM I have learned many things. I gained new knowledge and friends. I learned a lot to be independent here. I have to manage my own life in daily terms and study. The challenging life at USM made me a time manager and a brave person. I was given the opportunity to participate in various activities and gain many new experiences with friends. Experience in managing activities and events. In addition, through the subject PGT436E I learned many types of technology applications that can be used in schools while teaching. I also use the technologies and applications I learn to facilitate my learning. I would like to thank my family, lecturers and friends who helped me a lot during my degree.
