## How different I am as 21st century teacher

### Go digital

Organizing teaching resources and activities on one's own website and integrating technology that can bring students' learning experience to a different level. Sharing links and offering digital discussions as opposed to a constant paper flow allows students to access and share class resources in a more organized fashion.

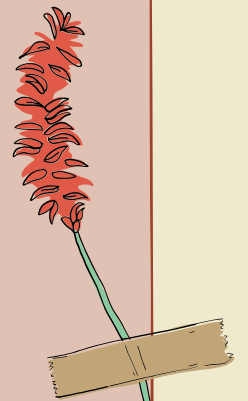

### Adaptive

Able to look at my own practice and adapt based on the needs of the student. Besides that, able to adapt to the curriculum and use my imagination to teach in creative way

### Critical thinking

Able to evaluate knowledge, clarify concepts, seek possibilities and alternatives, and solve problems using logic and imagination.

Although being a teacher is not my first dream, but I hope that I'm able to make my students dream come true
