

HOW DO I BECOME A CREATIVE TEACHER

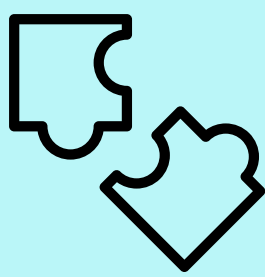

BRAINSTORM

Whether i work on it alone or with others, brainstorming can be a great way to get my creative juices flowing. Let my mind roam and don't expect every idea to be a winner.

- A technique for recalling about a topic. It can be a large or small group activity. It encourages students to focus on the topic and contribute to the free flow of ideas.
- I can begin with a question, problem or introducing a topic. Then, students can express their ideas.
- Brainstorming strategies such as listing, looping, or using asking questions (5WH)
- Example of based-learning activity: project based learning.

USE PUZZLES AND GAMES

When students are having fun, they often forget they're learning. Puzzles and games can challenge them to think creatively but also provide entertainment that will make them more motivated to keep learning and working.

- Competitive activity in which participants should give the answers to the questions in prescribed span of time following some predetermined rules.
- To enhance learning experiences for students to do the quizzes. From that, i can know their strengths and weaknesses.
- I can do the quiz games such as kahoot to create formative assessments or review games.

TEACHING STYLE (VISUAL CENTERED)

Visual Centered is one of the teaching style that can be used by teacher in online classes. This teaching style is a type of learning that uses image, graphics, colors and maps to communicate ideas and thoughts.

- Visual learners must see information in order to learn it.
- By using this teaching style, i will use visual materials such as videos, images or graphics to help student learn and can help students improve their understanding on the topic that being taught.
- That videos and images are directly processed by long term memory so by using visual centered style can improve students' learning process.

USE TECHNOLOGY

Technology is an amazing tool for boosting creativity. It can be used to find ideas, brainstorm, and even create final products. The possibilities are endless, so don't count it out when working on creativity.

- Genially
- Piktochart
- Canva
- Toondoo
- Powtoon
- Storyboard
- GoAnimate
