

# INDIVIDUAL ASSIGNMENT [10%]

Choose **one food** from the list below:

- **Raw meat**
- **Oyster**

## Essay

- 3 - 5 pages including references, double spacing, Times New Roman 12

Write an **essay** related to **pathogenic bacteria** that might contaminate the food. You need to identify the **source of contamination**, **symptoms of the foodborne illness**, and the **prevention methods** pertaining to the pathogenic bacteria. You can also add other information that you think is necessary to be included in the essay (e.g. **statistic of outbreak**, **intrinsic/extrinsic factor**, etc..)

**Submission deadline 14 Jan 2021**
