

IMG 222 FOOD MICROBIOLOGY 2

NORLIA MAHROR OCT 05, 2020 09:56AM

ANONYMOUS OCT 10, 2020 04:05PM

Hi Dr., I'm Pua Yue. I think that IMG 111 was all about the general basic knowledge of microbiology which include many important concepts and techniques that will helps us a lots to understand and master the topics in IMG 222 which will focus more details on food related microbiology. I really enjoyed learning microbiology from Dr. last sem and hope to learn more about this in coming lectures.

Awesome!! – NORLIA MAHROR

Great! Thank you Pua Yue.. – NORLIA MAHROR

ANONYMOUS OCT 10, 2020 04:06PM

From Desmond

Hi Dr Norlia, Desmond here XD. So I think that with the knowledge from IMG111, it is easier for us to know that how does it relates to the application in the industry as the topic in IMG222 states. Since by knowing the behavior of certain microorganism we can know the way to encounter them in all cases.

I think I grew a bit plum because of this few months of MCO gege.

Very good! It's ok. still look cute .hehe – NORLIA MAHROR

ANONYMOUS OCT 10, 2020 01:22PM

My opinion

Hi Dr, I am Wong Pei Xin. I hope Dr is fine there. Based on my opinion, I think MG111 is the basic principles for food microb and it is very useful for our IMG222. this is because what we learned at IMG111 is related to IMG 222, and we can always try to apply what we learned in previous course (IMG 111) to the up coming course (IMG 222) , the only thing is IMG 222 will be a level up for us as it provides more details about food microb. Thank you Dr. take care, stay safe.

ANONYMOUS OCT 10, 2020 09:53AM

My point of view on IMG 222 :

Hi, Drs. I'm Chong Shin Lin. From my point of view, IMG 111 is the basic microbiology knowledge from us to start learning IMG 222. IMG 222 is more related to food. IMG 111 let us know IMG 222 more easily for example we had learnt about the physical and chemical properties of the bacteria and pathogen during IMG 111 classes.

Very Good! – NORLIA MAHROR

ANONYMOUS OCT 10, 2020 09:31AM

Hi Dr. I'm Tee Jue Kang. 😊 In my opinion, i think img 111 is the basis for us to microbiology as the thing we learn are more general. When it comes to IMG222, the scope of the course are more related to food products. Thus, we can try to apply the knowledge we learn from img 111 into img 222

ANONYMOUS OCT 13, 2020 05:55AM

My opinion XD

Hi Dr Norlia, LeeYuan here! From my point of view, IMG 111 is the basic knowledge about microbiology. The knowledge we gained from IMG 111 in last semester will be quite related to IMG 222 and thus can help us to understand IMG 222 better as IMG 222 will focus more on the food related microbiology. What we learnt from IMG 111 thus can be applied in IMG 222 later. Thank you Dr. and stay safe! :)

Great! – NORLIA MAHROR

ANONYMOUS OCT 13, 2020 05:55AM

My Opinion

Hi Dr, my name is Nur 'Ain Syakirah. For me, i think that in IMG 111 we learned generally about microbes like the factors that trigger the growth of microbes. For IMG 222, I think that we will learn more detail about microbes that related to food. So for sure the previous subject will be used for this subject. :)

Great! – NORLIA MAHROR

ANONYMOUS OCT 10, 2020 08:42AM

My opinion:

Hi Dr, I am Lim Shu Jie. I think knowledge from IMG 111 are so imperative to help us to understand more deeply for topics in IMG 222. For me, we just learned the basic principles, mechanisms dan basic overview in food microbiology. It relates to IMG 222 when it comes to more particular food and needs us to understand the fundamental principles before it going to more complex topics. Thank you.

Very good! – NORLIA MAHROR

ANONYMOUS OCT 10, 2020 08:43AM

My thought on IMG 222

Good afternoon, Dr. My name is Kow Rong Ze and I'm fine here. With the previous knowledge learned from IMG 111, I think I'm more ready to learn this course. This is because IMG 111 provides us the fundamental knowledge of microbiology before proceed to a higher level of microbiology. Thank you~

Great! – NORLIA MAHROR

NORLIA MAHROR OCT 10, 2020 05:28AM

REFLECTION

Salam & Hi everyone!!

Please **INTRODUCE YOURSELF** and share your **SELFIE** =P. Last time we don't have much time to get to know each other.. But now I hope I can remember all of you.. =). How's your previous class on IMG 111? I hope you enjoyed the class...;-)

Please have a look at the topics for IMG 222 that I've posted in eLearn and share with us **how do you think the knowledge from IMG 111 can help you in IMG 222..** How does it related??

Please do this task before we start our class next week. Thank you..

BYE...(")

ANONYMOUS OCT 11, 2020 06:47AM

My opinion

Hi Dr, Im Sarah Nuraini. I hope you're in a good hand. In my point of view, IMG111 is the foundation where i learnt basic knowledge of microbiology. Meanwhile for IMG222, we will go for more details of microbiology which include the food products, fruits and vegetables, and many more.

Great! – NORLIA MAHROR

LIM BAO LING OCT 11, 2020 12:13PM

From BaoLing :

Hi Dr, my name is Lim Bao Ling. For the previous semester, I enjoy IMG 111 classes very well. From my point of view, in IMG 111 we study on the basic knowledge of microbiology. Thus, it gives us an overview to IMG 222 courses that are more related to food and more details. At the same time we can easily understand IMG 222 courses by having the knowledge gain from IMG 111.

Thank you Dr. =)

Stay Safe

Stay Healthy

Awesome! – NORLIA MAHROR

ANONYMOUS OCT 11, 2020 01:05PM

Hello Dr Norlia! I'm Allia Nadjih. Glad to have you as my lecturer again for this sem!

I think IMG 111 provides me with a lot of basic knowledge regarding microbe and their properties/behaviour, functions, effects and whatnot. This knowledge could prepare me to learn more in-depth about food microbiology II.

Ps: I don't have a selfie >< so I'm sharing this photo with my friends. I'm the middle one!

Great!.. Its ok, nice pic =) – NORLIA MAHROR

ANONYMOUS OCT 11, 2020 01:13PM

Hi Dr, my name is Nur Aina Syamimi binti Rosmi. I think the previous img 111 is all about the basic of microbiology that we need to learn and mastered in order to futher our learning for img 222 that will focus on food microbiology. Im looking forward to know about it soon. Thank you Dr and stay safe!

Great! – NORLIA MAHROR

SHUHADA ADLIN OCT 11, 2020 01:22PM

My opinion <3

hi Dr, I'm Nur Shuhada Adlin. In my point of view, i think IMG 111 is where we learn about fundamental microbiology in food, how the bacteria growth, what is the function of bacteria in food and many more. I think we will learn more further about microorganism of food in IMG 222 such as microorganism in milk, meat, seafood. I really enjoyed the previous IMG 111 class and looking towards more in IMG 222 class.

I don't have latest selfie so i will put my picture during orientation week ><. Thank u dr. Stay safe and stay healthy ^^.

Great! I miss my orientation week too. =P – NORLIA MAHROR

ANONYMOUS OCT 11, 2020 01:44PM

My thought

salam and hi Dr.Norlia.I am Nurulhuda binti Mohd Yunus.In my point of view, i think IMG11 is the basic knowledge of microbiology.In IMG11 we have learn more about tiny creatures such as bacterial,fungus and so on.So I think in IMG222 we will learn more exciting topic and further about microbes that more related to food. Im looking forward about it soon. Stay safe and Stay healthy, Thank you Dr.

Great! – NORLIA MAHROR

ANONYMOUS OCT 11, 2020 01:36PM

Hi Dr, my name is Nur Shazwani bt Abu Hassan. In my opinion, img 111 is basic knowledge about microbiology. Im really enjoyed learn img 111 last sem . So for img 222 i think its more details about microbiology. We will learn details about microbes in food. Im excited to learn img 222 for this sem. Stay safe Dr

Great! – NORLIA MAHROR

ANONYMOUS OCT 11, 2020 01:54PM

Hi Dr I'm Aliah Syafiqah. It feels so good to be back and start the new semester. Yeay I'm glad to have you back as our lecturer for this course.

Honestly last semester during IMG111, i enjoy learning basic topic on microbs and the most thrilling part for the course is of course during lab because I get excited to try experiments. But somehow it only last for few weeks. Going through the topics on IMG222, i can see we're going more details and specific. Looking forward to learn things and start fresh! That's all i guess. Take care dr and stay safe❤️

Awesome! Good to hear that you love the lab classes =)

– NORLIA MAHROR

ANONYMOUS OCT 11, 2020 02:14PM

My Opinion

Assalamualaikum and Hi Dr ! My name is Nur Asyikin :)

In my opinion , IMG 111 subject provides the basic of food microbiology that we will use for further details in IMG 222 subject on this sem. IMG111 also provide many basic knowledges and skills of microbiology to us in ordered to further IMG222. I really enjoyed this subject last semester and I really excited to study more about food microbiology. Stay safe and stay healthy Dr !

Awesome! – NORLIA MAHROR

ANONYMOUS OCT 11, 2020 02:11PM

Hi Dr, I am Ahmad Fakhzan Lim.

In my opinion, I think that on IMG111, we learn about the foundation of food microbiology where it gives us basic knowledge for the whole food microbiology course. For IMG222, I think that we are going to learn more details about food microbiology. In other words, IMG222 is more about the application of microbiology in the food industry. Thank you, Dr.

Great! – NORLIA MAHROR

ANONYMOUS OCT 11, 2020 02:48PM

My opinion

Hi, Dr. I'm Lim Yu Hui. I really enjoyed the class last semester. I think that IMG 111 is the basic knowledge about food microbiology. In this semester, I can apply what I learned last semester to IMG222 and easier to understand in coming lectures. I hope that I can learn more details about microbes in food.

Thanks Dr. Stay safe and stay healthy.

Great! – NORLIA MAHROR

ANONYMOUS OCT 13, 2020 04:10AM

My Opinion

Hi Dr, my name is Aida Farzana. In my opinion, I think IMG 111 is where we learned the basic knowledge about microbes for example like the type of bacteria. we also learned what medium that is suitable for some type of bacteria. For IMG 222, I think we

will learn further about microbes that are more related to food. Thank you Dr. stay safe and stay healthy :)

Great! – NORLIA MAHROR

ANONYMOUS OCT 11, 2020 03:30PM

Hello Dr 😊 I'm Nadeen Raha and it is good to meet u again. Regarding for the reflection on IMG 111, I think the subject is basically about the fundamental knowledge about microorganisms and all of their kinds in order for us to deeply understand about their backgrounds before we proceed to IMG 222 which is more about the microbes that related to food.

Great! Nice labcoat =) – NORLIA MAHROR

ANONYMOUS OCT 11, 2020 03:28PM

Salam & greetings, hello Dr Effa & Dr Norlia, I am Aina Natasha Binti Mahmood. Glad to be back :D

My thoughts on IMG111 is basically it explains the fundamentals of basic microbiology, going through roughly on the topics in IMG222 make me extra thrilled, we will be learning more about food microbiology. Can't wait!

Stay safe & Thank you Drs.

Great! Nice mask -=P – NORLIA MAHROR

ANONYMOUS OCT 11, 2020 04:26PM

Salam and hello to Dr Effa and Dr Norlia.

I'm Ummi Amira Binti Mohd Said, for me in IMG111, we're studying the basic microbe principle, what's in there, the mechanism of the organelles, and all those things that would be very helpful for us to understand IMG 222, that is sure going to be more complex and precise about the food microbes.

Great! – NORLIA MAHROR

ANONYMOUS OCT 12, 2020 02:07AM

Hello Dr Norlia and Dr Effa, I am Chan Kher Sing.

In my opinion, IMG111 is the basic knowledge for IMG222. The topic and knowledge that we learnt in IMG111 can help us to understand more deeply in IMG222 especially in how to control and handle microorganism in processing food.

Take care and stay safe Dr.

Great! – NORLIA MAHROR

ANONYMOUS OCT 13, 2020 04:18AM

Hi Dr., I'm Onn Ke Yi. I think that previous IMG 111 had introduced us the basic knowledge of microbiology and all those fundamental principles and techniques will help us to understand IMG 222 which is more detailed and particular to each types of food. Thank you :)

Great! – NORLIA MAHROR

ANONYMOUS OCT 12, 2020 03:14AM

Good day Dr, I am Lau Weng Nyan. IMG 111 is indeed a stepping stone for us to learn IMG 222 as we are now going to go deeper into microbes in food products. I think we are now well prepared to learn IMG 222 and I am really looking forward to apply the

previous knowledge in this subject! Glad to have you and Dr Effa back as our lovely lecturer! =)

Great! – NORLIA MAHROR

ANONYMOUS OCT 12, 2020 02:35AM

My Opinion :)

Salam and hi Dr. I am Nur Farah Batrisyia. I think that in IMG111 is about the fundamental knowledge of food microbiology where we learn about the microbial structures, behaviour, metabolism and others. So with this knowledge will help us to understand better in IMG222 where we will learn more deeply of microorganisms in food processing.

Thank you and stay safe Dr!

Great!! – NORLIA MAHROR

ANONYMOUS OCT 12, 2020 02:27AM

Hi Dr, I am Chuan Wan Lin. I think IMG111 introduces the general knowledge of food microbiology and covers some basic techniques of microbiology. While IMG222 will expose us to the detail of food microbiology, which is related to the quality of various food commodities. Thank you.

Great! – NORLIA MAHROR

ANONYMOUS OCT 12, 2020 03:18AM

Good day Dr, I am Lau Weng Nyan. IMG 111 is indeed a stepping stone for us to learn IMG 222 as we are now going to go deeper into microbes in food products. I think we are now well prepared to learn IMG 222 and I am really looking forward to apply the previous knowledge in this subject! Glad to have you and Dr Effa back as our lovely lecturer! =)

Great! – NORLIA MAHROR

ANONYMOUS OCT 12, 2020 04:24AM

Hi Dr Norlia and Dr Effa, I am Loo Cayyn. Glad to have you as our lecturer again for IMG222. From my opinion, IMG111 more to basic knowledge that help us to understand about this subject whereas IMG222 will be more detailed and will be deeper about microorganism in food processing in this new semester. Thank you& Stay healthy!~::~

Great! – NORLIA MAHROR

ANONYMOUS OCT 12, 2020 04:20AM

Hi everyone!

My name is Nur Fatimah Asyikin bt Wan Chik. Personally, I think IMG111 actually serves as an introduction for IMG222. In IMG111, students are introduced to fundamentals knowledge of microbiology like microbial growth and microbial metabolism which will be very useful when learning IMG222 later. Other than that, IMG111 also cover basic techniques of microbiology such as microscopy, staining and media preparation. I am sure, we will learn more detailed information about food microbiology in IMG222 later. Thank you!

Great! – NORLIA MAHROR

ANONYMOUS OCT 12, 2020 06:13AM

Goodday everyone. I'm Muttha. I took IMG 111 a year ago and I had good time learning about microscopy, organisms and techniques of handling culture medium. I the knowledge i gained in IMG 111 aids me in IMG 222. I am very excited to be back into microbiology with our lecturers. Looking forward to have a great session with yall. All the best to us!

Great! – NORLIA MAHROR

ANONYMOUS OCT 12, 2020 06:33AM

Thoughts on IMG 111

A very good day to you Dr.Norlia. It's me Shashi Kumar. Regarding your curiosity, i felt that IMG 111 is a general study on microorganism that we share our space to live with. It was a good knowledge to know them better and what they are capable of. As, we know not all microorganisms that acting as a villain in human life. Some of them are beneficiary for human and especially we, Food Technologist who can utilize them either to create new food or preserve a food from spoilage and this is what we might learn in IMG 222 i believe. By learning the basic principle and their nature in IMG 111, i believe we might learn how to use them in positive way and avoid from getting injury by them as well as stop them from spoiling our food in IMG 222. However, i miss our IMG111 lab sessions where we can see them physically under microscope. Looking forward to gain more precious knowledge about microorganism and defense their attack on food through you and Dr.Effa in this IMG222. Miss you Dr.Norlia <3, hehehe...

Awesome. very insightful! The best reflection so far.. congrats!
— NORLIA MAHROR

HANIS LILIANA OCT 12, 2020 07:59AM

Assalamualaikum and Haii Dr Norlia . My name is NUR HANIS LILIANA BINTI ROSLI and I am Kedahan.🌸🌸 In learning IMG111,I gain more knowledge on how the small small things called as microbes make some food become poisonous🤢 and cannot be eat anymore but in some food can. I thought that there are no difference between the previous IMG111 with IMG222 because they are related to each other. But I think for IMG222 will be more challenging than IMG111. Why I am saying that because IMG222 is the course from IMG111, if we are lack knowledge about IMG111, it might affected our understanding in learning IMG222.At last, I hope that we are all healthy and everything is simplified for us during this MCO and online classes.🙏 Thats all Thankyou 😊

Awesome! Very insightful! — NORLIA MAHROR

ANONYMOUS OCT 13, 2020 04:20AM

Salam and hi Dr. My name is NurFarhana binti Ghani. I really enjoyed learning IMG111 and I believe it was just the first part of the whole syllabus in order to make us familiar with the concept or general term of microbes in food before we continue with more difficult part which is IMG222. I really look forward to learn IMG222 and I believe the previous learning of IMG111 will help me better to understand IMG222. Thank you!

Great! — NORLIA MAHROR

SYIFA SYAMIMI OCT 12, 2020 10:38AM

Hi Dr Norlia, my name is Nurul Syifa Syamimi. I think IMG111 is the basic knowledge to understand IMG222. In IMG111 we learned about types of “micro things” . So this semester in IMG222 we will learn more about them. We also learned control of microorganism last semester so I think we will learn on how can we control the microorganism in food processing. So it is really helpful to learn IMG111 since IMG222 will be more challenging.

Take care and stay safe Dr :)

Hi Hooi Ling, nice to know you.. Welcome to our microbiology class! – NORLIA MAHROR

Great!! – NORLIA MAHROR

ANONYMOUS OCT 12, 2020 08:51AM

Assalamualaikum and hi Dr Norlia. I'm Nur Zahirah binti Zahir. I think IMG 111 is the key knowledge of microbiology from us in order to continue learning about the IMG 222, which will allow us to understand further. In IMG 222 it will be related to the food. Thank you

Great! – NORLIA MAHROR

ANONYMOUS OCT 12, 2020 09:04AM

Hi and assalamualaikum Dr Effa, Dr Norlia. Im nurathirah najwa bt nazir. hope u stay safe and healthy. i started with basic knowledge but learning img 111 make me learned more new things such as types of microbes and we can see it ourselves under microscope how it exactly looks like. knowledge that we have learned from img 111 wil be useful nd helpful in img 222 that we will start learning soon. take care dr :) have a nice day

Great! – NORLIA MAHROR

ANONYMOUS OCT 12, 2020 08:08AM

My opinion

Hi, Dr. I'm Aminatun Zaharah, the one in the right side in the photo. Honestly, IMG 111 was one of the interesting subject that i learned in previous semester. By learning it, i got to know more information about microbial nutrition, growth, metabolism, genetic and etc in microorganism. This knowledge will be very helpful for IMG 222 because it's the basic fundamental in microbiology. Can't wait to learn more about IMG 222. Have a nice day Dr :)

Great! Nice pic! – NORLIA MAHROR

ANONYMOUS OCT 12, 2020 08:46AM

Hi Dr. I am Chuah Hooi Ling. During the last semester i did not attend IMG 111 as I got an exemption for that course. Hope to bring back what I had learnt before and learn more from Dr. Thank you and take care!

ANONYMOUS OCT 12, 2020 09:19AM

Hi Dr , I'm Siti Noor Iqamal Binti Mohd Noor. I think IMG111 is the basic knowledge in food microbiology that we need to know before further with IMG222 which is more complex. With the basic knowledge that we have learn from IMG111 we can apply it in IMG222 that more related to food. IMG222 ,see you soon!! 😊 Thank you and have a nice day Dr. 😊

Great! – NORLIA MAHROR

ANONYMOUS OCT 12, 2020 12:49PM

Hi Dr Norlia, I'm Yeoh Yi Rou. I think that IMG 111 enable us to learn about the basic knowledge of microbiology which includes the topic of the microbes structure and function, their physiology and the ways to control them. All these basic knowledge are helping us to be well prepared for IMG222 which is more deeper as this course is more related to food. I'm really looking forward to the new course! Thank you.

Great! – NORLIA MAHROR

ANONYMOUS OCT 12, 2020 03:56PM

Good day Dr, I'm Lim Ying Li. As for me, IMG 111 is boring as we need to memorize all the fundamental aspects of microbiology. However, it is interesting as i just realized that we can try to ignore the bad things and bad people around us but we can't ignore those bad microbes around us. If not, it is fatal. By the way, i believe IMG111 which is the subset of IMG 222 had given us a clear picture of what microbiology is before we expose to more deeper field. Cheers.

Awesome! Thanks for the honest reflection! =) I hope we can make the class more interesting for IMG 222. hehe – NORLIA MAHROR

My Opinion

Asalamualaikum and Hi Dr Norlia,i am Aiman Hakim and i am fine here at johor bahru.I hope you are fine also since the cases are increase recently.IMG111 is the basic knowledge that should learn before taking IMG222 this semester.So i become more ready to learn and experience the IMG222 that i thought it would be more advanced than IMG111.I am very excited to learn IMG222 and being curiosity to know more about microbiology in food.

Great!. I love hiking too =) – NORLIA MAHROR
